

GEFA SHIP SUPPLY
RUBBER PRODUCT

WHO ARE WE ?

Our journey started as “ Korkmaz Ticaret ” in 1984 when we used to sell rubber based products. It is evident that we’ve come a long way in a short time considering the circumstances of the trade industry in these years. With an experience of 10 years in the industry, we took a step further to expand our corporation and renamed it as “ Ge- Fa Gemi ve Fabrika Malzeme Sanayi Ticaret Limited Sirketi”.

Since then, we have always targeted to develop our knowledge and experience on rubber based products. We established our rubber manufacturing facilities just one year after the foundation of the rubber legislation. During those times, our daily production of rubber covers used in ships hatchways, was 120 meters.

Our target has always been to offer quality products and the best services to meet the needs of the Turkish Industry which is in a never-ending developing movement. In 1998, we began to produce waterproof items to meet the high demand. Waterproof materials are a significant part of the national industry and we have been providing services in this field with a highly qualified technical personnel.

In 1999, we opened our retail store in Tuzla Shipyard Region, also known as the heart of the Turkish Shipbuilding Industry. Every passing day we get closer to our targets thanks to our policy of focusing on going beyond of todays technology.

The period after year 2000 is very important to us because that year we started our investment activities. Now, the company runs all the manufacturing works of Rubber based products and waterproof elements in our own facilities of 1500 m2 in Umraniye region. todays production capacity of hatchway rubber is 520 meters.

Addressing requests from almost every industry in Turkey, a wide range of product diversity and service quality have always made us different from our competitors on the market.
